QLS LYNGSOE INTELLIGENT HOLD™

SMART RFID HOLDS

EASY HOLDS MANAGEMENT
Intelligent hold pick up shelves use proven RFID technology that allows easy holds management. The Intelligent holds pickup solution will eliminate the need for hold slips. This will increase privacy for patrons, streamline holds management and reduce workload for library staff.

Use of RFID smart shelves allows staff to place items freely in holds pickup shelves. Items are no longer needed to be placed on shelves in alphabetical order or based on dates when the item is available for pickup. RFID smart shelves will always know the position for each item. The position of the item will be informed to the patron to pick up the correct item without using hold slips.

When scanning the patron card, the unit informs the shelf number and the patron can easily pick up items.

EASY TO ADD EXTRA HOLD SHELVES
The intelligent hold shelves are on wheels and connected by a single cable, which makes it easy to add a new hold shelf when one is full.

BENEFITS
- Massive capacity
- Easy expand
- Stylish design
