TR2601
600mm x 650mm x 750mm High
The small trolley is normally supplied with the small outside bin (pictured right) but is available separately.
Capacity is approximately 1.5 Timber Dump Trolleys.

Check-In

For larger organisations receiving quantities of books in cartons: The courier simply places cartons on the roller conveyor - they are then just pushed up to the work bench for processing. Roller conveyors can be made in different shapes - should you want them to travel around the wall to meet up with a bench - no problem - we're happy to provide return solutions for you.

Library Mate - consists of a lifter system either beside or built into the bench. The courier places the cartons or tubs on a smart pallet whereby they are loaded onto the Library Mate with a porters trolley OR / The courier can drop the cartons or tubs onto the special trolley - the trolley is wheeled into the Library Mate where the trolley is lifted up until the top tub is at working height - the empty tub is discarded then it lifts up the number two and so on.

Check-In

Automated Internal Returns (RFID)

Automated check-in After Hours or during hours. The RFID controlled door opens up when the book is presented - the book is then checked in - reactivated security - then sorted into three different bins.

External Returns (RFID)

The counter at Jimboomba has been altered to accept an electronic “E” bin - Quantum have altered the counter - installed the “E” bin and provided a privacy panel that lets the staff see who’s coming but at the same time they have complete privacy.
